In my file admin.vfs
i typed that:
"c:\TDS3" /
"c:\toto" ./site/mnt/drive
i create a dir in the racine c:\ toto
The i create in my folder ioftpd /site/mnt/drive
after lauching ioftpd
when i type in bar flasxp /site/mnt/drive
but it doesn't work for me
help me pleaz

tons of people that help you with any problem you have!!
solved my probs for me 😊

oki thanks man they resolved my problem 😊😊

I wish I could find a proper way to exec on ioftpd, meh.

its in the ioftpd.com forums. search there.

I wish I could find a proper way to exec on ioftpd, meh.

Just enable the exec scripts SO MUCH BETTER THAN IN SERV-U Cause it actually lists the output of your command in the ftp client.
